

GN Ellipse ISDN Only

These are the items that are included in the GN Ellipse Cordless Headset Kit (except phone). Headset must be purchased separately.

Lifter

Lanyard

Belt Clip

Charging Dock

Remote

Power Supply

Short Phone Cord

Headset Holder

Administrative Information Only

NOTE: This system works with both 7506, 7507, and I2021 series phones.

GN Ellipse

Set the handset aside and remove the stickers on the back of the lifter so the adhesive material is showing. Press the lifter onto the phone as shown here.

Administrative Information Only

GN Ellipse

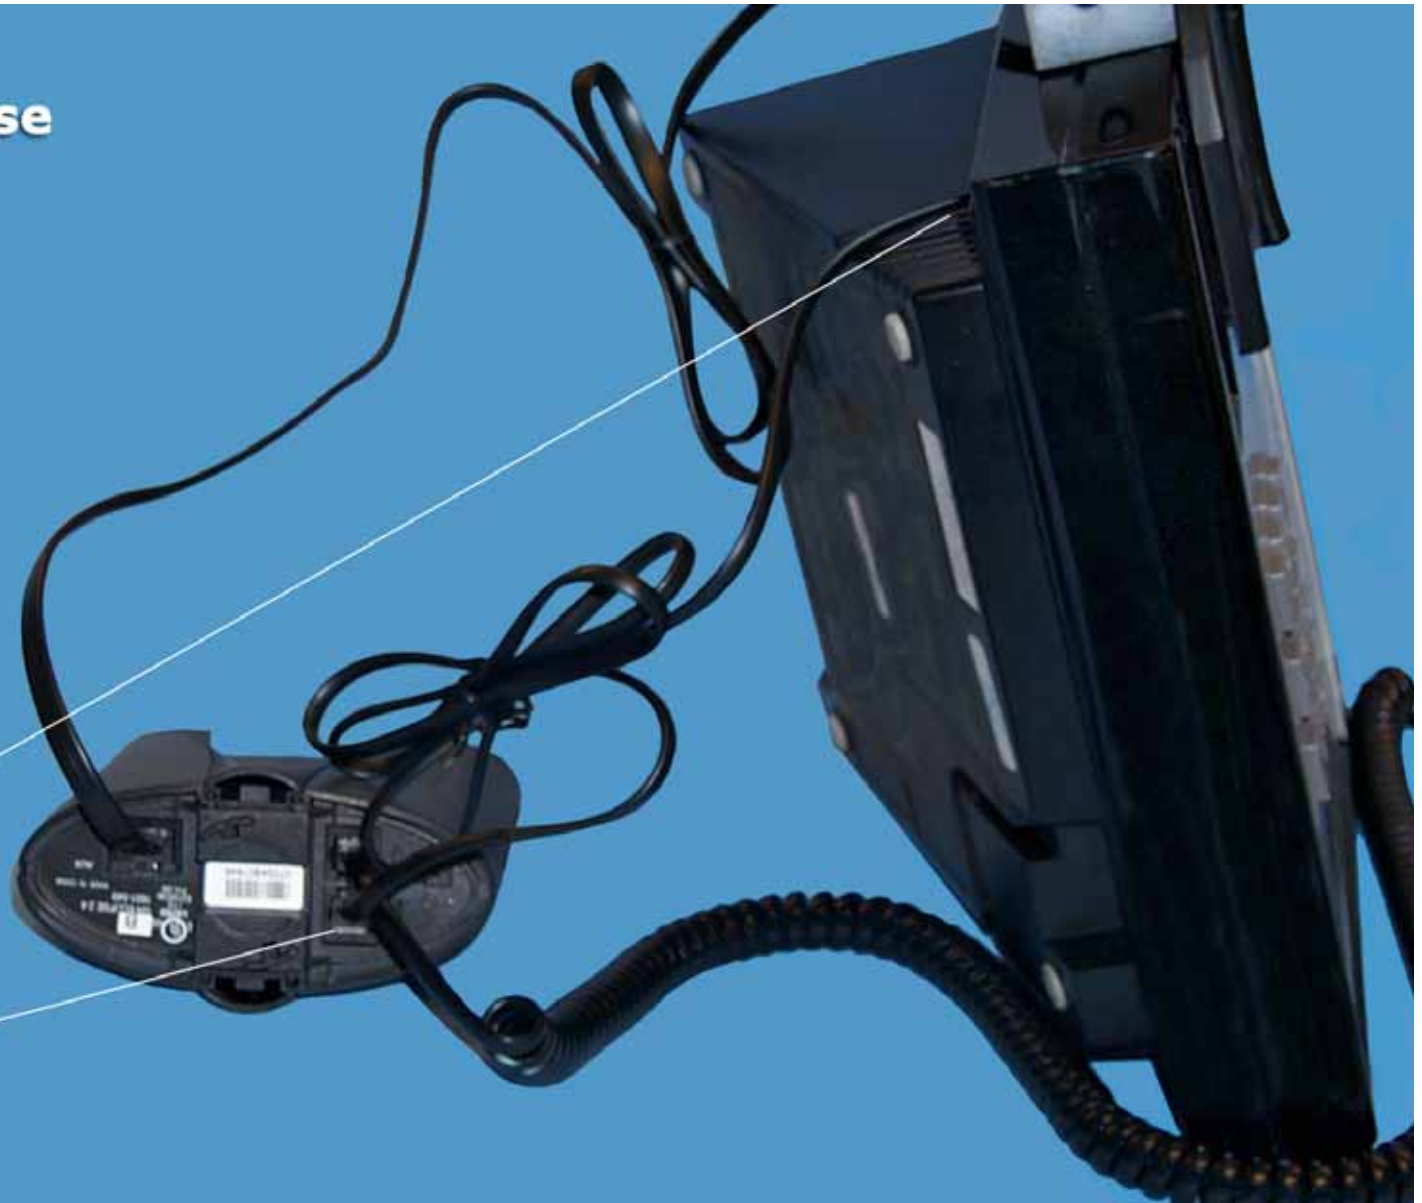

Connect the cord from the lifter to the bottom of the Charging Dock where it says "Aux".

Disconnect the coiled phone cord from the underside of the phone and connect it to the bottom of the Charging Dock where there is a picture of a receiver.

Administrative Information Only

GN Ellipse

Connect the short
phone cord to the
handset plug on the
phone and to the
bottom of the
Charging Dock
where there is a
picture of a phone.

Administrative Information Only

GN Ellipse

Attach the power supply to the bottom of the Charging Dock and plug into an electrical socket.

GN Ellipse

Attach the Base Plate to the Charging Dock by matching the holes on the plate to the prongs on the Charging Dock and twisting to the right.

GN Ellipse

Attach a headset to the Remote by plugging the end of the headset cord into the bottom of the Remote and pushing in until it snaps.

GN Ellipse

Attach the belt clip if necessary by sliding it upwards onto the back of the Remote. (There is already a wire belt clip on the back)

GN Ellipse

Attach the clasps to the wire belt clip and wear around your neck if desired.

GNEllipse

Slide the remote into the
Charging Dock as shown
here.

Administrative Information Only

GN Ellipse

Replace the phone handset to its original location and charge the Remote battery initially for 3 hours.

Administrative Information Only

GN Ellipse

Transmit Settings

Telephone Settings

Battery Charge Indicator
